

Kirton Point Primary School

Room 25 Term 2 - Week 5 Newsletter

The student's are loving being back at school, enjoying their daily learning routines and catching up with their friends. They have especially enjoyed reconnecting with their reading buddies each morning.

Mathematics

We have been exploring measurement and experimenting with an array of measuring tools. Some of the following photos show the students measuring length using unifix cubes, teddy bears, hands and feet. We will move along now to comparing and measuring weight. Number is always an ongoing focus around activities such as connecting number names, numerals and quantities, subitising and counting from different starting points.

Literacy

During our daily InitaLit lessons (Literacy Program) the students have been working hard learning new sounds and the corresponding letters. Leading from this they do an array of activities where they have opportunities to practise reading and spelling words with the new sound that has been introduced. I have certainly seen lots of growth in the students being able to blend sounds together to read words.

Cooking

We have been cooking with Miss Seal. The students are learning lots of skills such as using a knife, peeling, grating, sifting, mixing, washing the dishes, setting the table, teamwork and most of all enjoying some delicious food that they have prepared and cooked. It's great to them being brave and having ago at tasting some new foods. Recently we prepared and cooked pumpkin soup, bread rolls and zucchini muffins.
